Enter to Vend Door Flaps test mode:

(1) Keep pressing TEST button and then reboot the machine.

(2) When it shows "33" on display, release the button.

(3) Press TEST button until it shows "03" on display. (03 is the test mode for Vend Door Flaps)

(4) Now press FREE PLAY button to activate the mechanism.

(5) The motor will run to make flaps in vend chamber opened and then pause for few seconds.

(6) Motor will run again to make flaps return to its original position and then stop.

There are some problems which may cause error 03:

1. If the motor didn't run when you teste it in the mode, it's probably caused by motor or drive board failure.

(1) Try to switch drive board from other one as pictured below and then test it again.

　　　　If it works, it is obviously caused by drive board failure.

(2) If it isn't working properly, the motor is failed.

Error 03
